**ANNUAL REPORT**  
OF THE  
**MEDICAL DEPARTMENT**  
FOR THE YEAR 1921.

---

**CHAPTER I.**

**Vital Statistics.**

**POPULATION.**—The Census of the Colony was taken during the month of April and the total population was found to be 24,705 of which 12,025 were males and 12,679 females. There were 3,066 children under 5 years in the Colony.

**BIRTH RATE.**—709 births were registered during the year, being 28·57 per thousand of the population, a decrease on last year when it was 29·81 per thousand.

**DEATH RATE.**—There were 392 deaths in the Colony during the year, being a mortality of 15·79 per thousand. Of these deaths 138 were in children under 5 years and of these 73 were under one. The high rate of mortality in young children was due to the epidemic of whooping cough.

**STILL-BIRTHS.**—There were 53 cases of still-births during the year.

Annexure I shows the number of arrivals and departures from the Colony and the number of births and deaths during the year.

**CHAPTER II.**

**Meteorological Statistics.**

Annexure II shows the monthly meteorological returns and number of deaths for the year.

**CHAPTER III.**

**Diseases prevalent during the year.**

**WHOOPING-COUGH.**—The epidemic of whooping-cough which commenced in 1920 continued during the first four months of 1921, and occasioned many deaths in young children.

**INFLUENZA.**—There was a minor outbreak of Influenza, the number of cases with complications was not high and the mortality therefore not heavy.

**CHAPTER IV.**

**Vaccination.**

As reported last year considerable difficulty was encountered in obtaining a reliable supply of lymph, but finally special arrangements for a cold storage during transit were made with the shipping companies and the results obtained by the lymph sent out by the Apothecaries Society are good.

**CHAPTER V.**

**Quarantine Station.**

The Quarantine Station was frequently in use but there were no outbreaks of contagious disease at the Station.

**CHAPTER VI.**

**Leper Camp.**

Additions were made to the accommodation for Lepers at Round Island. There were 7 inmates at the beginning of the year and there were 3 admissions and 3 deaths.

## CHAPTER VII.

## Pauper Institute.

The Fiennes Institute for the aged poor continued to afford asylum for many destitute people, the average number of the inmates was between 90 and 100.

## CHAPTER VIII.

## Maternity Home.

PATIENTS :—There were 242 patients admitted.

The number of babies born was 172.

There were 4 cases of twin birth.

Chloroform was given in six cases.

There was one case of puerperal Eclampsia.

## CHAPTER IX.

## Staff.

Dr L. V. Tebbs the A. M. O. Praslin was unfortunately obliged to be invalided to Europe and left on March 13th.

Dr J. T. Bradley returned from leave on February 23rd and took up the duties of A. M. O. Victoria, and since the departure of Dr Tebbs has visited the Praslin district fortnightly.

Miss M. G. Halkett, the Matron of the Maternity Home went on leave prior to retirement on August 3rd after 10 years valuable service ; she was replaced by Miss L. J. Hanson who arrived on September 1st.

Dr Brault filled the post of A. M. O. South Mahé throughout the year.

J. B. ADDISON,  
Chief Medical Officer.

# ANNUAL REPORT

## OF THE

### ASSISTANT MEDICAL OFFICER, SOUTH MAHE

#### FOR THE YEAR 1921.

SECOND ANNUAL REPORT.—I have the honour to forward my second Annual Report on South Mahé District, First and Second Divisions.

CENSUS 1921.—Population 4,604.

#### Prevalent Diseases in 1921.

WHOOPING COUGH.—The Epidemic of whooping cough was quite general amongst the children of the District. It ended only in April. 10 deaths occurred amongst children under 5 years of age: 7 from Whooping Cough; 3 from Complications, *i.e.*, Broncho-Pneumonia.

INFLUENZA.—Five deaths were registered as due to Influenza during the Epidemic prevailing during the first 3 months of the year. Most of the people suffered from it. The disease was rather benign in its form.

ANKYLOSTOMIASIS.—There has been a recrudescence of this disease during the last six months.

A general reinfection for 1922 is to be apprehended.

VACCINATION.—A. Children successfully vaccinated	1st time	150
B.       "       "       "       "	2nd time	11
	Total ...	141

Vaccination had to be discontinued during nearly six months.

The lymph received during this period was absolutely inert.

VITAL STATISTICS.—A comparative table for the last two years shows :—

	Births	Deaths	Marriages	Still-Births.
1920	166	60	20	12
1921	142	67	21	11

R. BRAULT, M.D.,  
Assistant Medical Officer.

# ANNUAL REPORT

## OF THE

### MEDICAL SUPERINTENDENT LUNATIC ASYLUM.

#### FOR THE YEAR 1921.

SECOND ANNUAL REPORT.—I have honour to forward my second Annual Report on the Anse Royale Lunatic Asylum.

HEALTH OF INMATES IN 1921. DISEASES.—The Asylum remained free from the Epidemic of Influenza prevailing in the district at the beginning of the year.

DEATHS.—Three deaths occurred during the year: one male and two females. One male and one female had been admitted during the year; one female at the end of December 1920.

Causes of death are thus given: General Paralysis of the Insane, Cerebral-Hæmorrhage, Tertiary Syphilis.

FOOD SUPPLY TO THE INMATES.—The food supplied by the contractor was of good quality throughout the year. An additional supply of vegetables coming from the Lunatic Asylum garden has been given to the inmates. It consisted of all the different varieties of vegetables generally cultivated in this country. The old garden adjacent to the wall of the asylum was abandoned for a new one much larger in size and more adapted to the exigencies of the cultivation.

The uncultivated yard of the A. M. O.'s quarters was turned into a flourishing garden. All the work was done by the lunatics under the direction of the Head Attendant.

May I add that the Asylum cannot be too grateful to him for the interest and good will shown throughout the year in the performance of this strenuous work.

The immediate results are for all a more adapted diet and for the inmates working a marked improvement of their mental and physical condition.

FORM OF MENTAL DISEASE.—A change has been made in Appendix B. regarding "Form of Mental Disease".

A new division of Mental Disease more in accordance with the recent researches on this subject has been substituted to the old one dating of some 15 years ago.

ADMISSION, DISCHARGES, DEATHS.—Appendix A. gives the number of admissions, first and second admissions, of discharges and deaths for the year 1921.

R. BRAULT, M. D.  
Medical Supt. Lunatic Asylum.

#### APPENDIX A.

#### STATISTICAL TABLES SHOWING THE ADMISSIONS, RE-ADMISSIONS, DISCHARGES AND DEATHS DURING THE YEAR ENDING 31st DECEMBER, 1921.

	Males	Females	Total	Males	Female	Total
In Asylum 1st January, including those out on trial ...	10	10	20	...	...	...
